

# Technical Data

## Parameters to Know

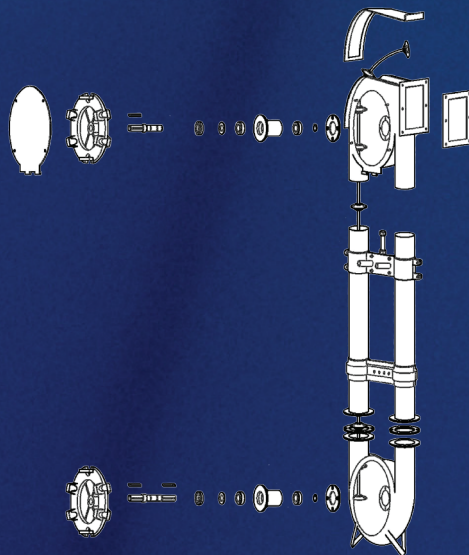

- Source equipment type
- Destination equipment type
- Material name
- Bulk density
- Particle size
- Throughput rate
- Material of construction
- Fixed or mobile
- Wash down
- Special requirements

Floveyors in Series

Floveyor Model	Maximum Length ft	Nominal Rate* ft <sup>3</sup> /min	Motor hp
F3	40	7½	2 - 3
F4	80	15	3 - 7½
F5	100	30	5 - 10

\*See agent for actual rate of a particular material.

FloAero Inc offers complete customized systems of equipment utilizing the Floveyor aeromechanical conveyor amongst other additional equipment to create Weighing systems, Minor ingredient systems, Refilling systems..... Systems can include equipment such as LIW or Volumetric Feeders, Bulk Bag Dischargers and Fillers, Blenders, Dust Collectors, Hoppers, Load Cells, Screw Conveyors, Sifters, Silos, and the necessary controls. These systems are designed by a qualified chemical engineer that has 25+ years of expertise in the bulk solids Industry.
